December 3, 2025

Our flagship, award-winning CR2700 and CRA-A271 are available with NIST FIPS 140-3 compliant security.

The CR2700 and CRA-A271 FIPS are FIPS enabled out of the box and are ready to transfer encrypted and protected data. There is no need to reconfigure or program the devices to get started. These units are set up with default passwords which can only be accessed by officer role level admin logins. These passwords can be updated by this officer role, if desired, before use.

The Cryptographic Module Validation Program (CMVP) has issued the following certificate to Code Corp:

FIPS 140-3 Cert. #	4718
Module Name:	wolfCrypt
Software Version:	5.2.1
Security Level:	FIPS 140-3 Level 1 (Overall)

Please note that CMVP **no longer issues hard copy certificates**. The official module validation information is posted on the NIST website, *Validation Lists for Cryptographic Standards* at

https://csrc.nist.gov/projects/cryptographic-module-validation-program/certificate/4718.

Please feel free to contact me should you have any questions.
